Professional Summary

Project and operations analyst with 2+ years of experience driving requirements, vendor coordination, and process improvement across digital transformation, financial operations, and data automation. Experienced in owning rollouts end-to-end, from stakeholder alignment to user testing. Completed PMI's Fundamentals of Predictive Project Management.

Professional Experience

Project & Operations Analyst

Mar 2023 – Jul 2024

Olympian Tek · Chennai, India

- Led requirements and planning for an RFID Physical Efficiency Test system, cutting reporting errors by 82%
- Coordinated vendors, timelines, and user testing to deliver the RFID system on schedule
- Built Tableau dashboards that made project and operational KPI reporting 30% faster across teams
- Streamlined KYC, SIP, and mutual fund data validation via CAMS, saving 42% in processing time

Software Engineer

Aug 2022 – Mar 2023

Arcadia · Chennai, India

- Built regex and SQL-based extraction templates for high-volume utility bills, cutting manual effort by 56%
- Refined extraction workflows, reducing single-person dependency and improving delivery consistency
- Developed scripts to simplify productivity reporting and Jira ticket tracking, improving visibility into team workload

Integrations Engineer Intern

Jan 2022 – Jul 2022

HyperVerge · Bengaluru, India

- Managed technical onboarding for 10+ enterprise clients, leading calls and email updates through go-live
- Resolved 40+ client integration issues through ServiceNow and Jira tickets, keeping deployments on track
- Created POCs and API connection scripts to speed up integrations for new client accounts

Projects

C-Neutral: Carbon Market Expansion

Oct 2025 – Dec 2025

Graduate Consultant · Bogotá, Colombia

- Delivered a market entry analysis of Mexico's carbon market, sizing an estimated \$25M+ opportunity
- Scoped and designed an emissions tracking MVP, estimated to cut manual reporting by 40% for clients
- Iterated the prototype through 2 rounds of team feedback, from requirements to final client handoff

ShelfLife.ai: AI-Powered Food Waste Reduction Platform

Mar 2025 – May 2025

Project Lead · Phoenix, Arizona

- Led a 4-person team in conducting a feasibility analysis for an AI food waste platform, modeling 20–30% cost savings
- Conceived the idea and crafted the pitch that won 1st place among 10 teams in a class competition
